

air septimanie A320 – Traffic Global Aircraft

Please find the A320 of our little virtual airline air septimanie (<http://www.air-septimanie.com>) as an add-on aircraft to be used with Traffic Global.

The livery corresponds to the livery for our **QPAC A320** (<https://forums.x-plane.org/index.php?files/file/27528-air-septimanie-occitania-livery-for-qpac-a-320-v11v20/>) by myself and the livery for the **JarDesign A320** (<https://forums.x-plane.org/index.php?files/file/65784-jardesign-a320-air-septimanie/>) by **royaloak**.

In order to use the livery, please unzip the **air-septimanie-traffic-global.zip** file and copy the extracted **air-septimanie** folder into the **320** folder of **Traffic Global** similar to other A320 liveries for **Traffic Global**.

Please note, that these objects have been released under the same license as the original items. You are free to use them and as a starting point for your own liveries, as long as you ensure to respect original work.

Thanks and Enjoy,
SLF68 – Markus Meurer
